COTTONSEED REVIEW - SOUTHWESTERN AREA

Oil mill prices for old seed remained at \$55 per ton, basis grade, f.o.b. gin or cards while in the Rio Grande Valley new seed were selling for \$57 per ton f.o.b. gin, as is basis. Movement of seed in the Valley is at an increased rate but certificates received are not sufficient to arrive at an average grade and will be included in the next cottonseed review.

Wide variations in grade are due primarily to the fact that surplus planting seed moved to the mills along with the seed from the final ginnings.

The sampling and grading of cottonseed is under the supervision of the Office of Marketing Services. From reports received during the period April 27 to July 27, 1945, the following data are given relative to grades of cottonseed in the counties named:

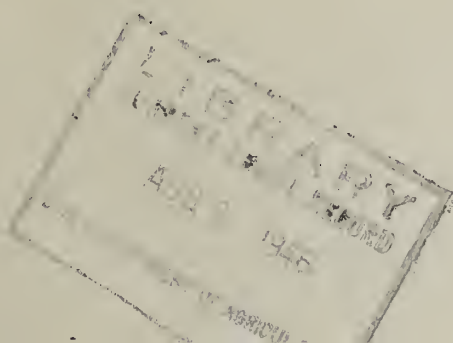

U. S. Standard				U. S. Standard			
Grades				Grades			
District and	Low	High	Avg.	District and	Low	High	Avg.
County	Grade	Grade	Grade	County	Grade	Grade	Grade
